

## Helping Hands by Paul Render

### To make these huge hands, you will need;

- 2 cereal boxes or any flat card you have to hand
- Anything laying around to decorate them, such as paint, tissue, tin foil or even pasta shapes and coloured paper cut outs
- Some fun and positive statements such as: 'helping hands' 'Give a big hand' 'We can turn our hand to anything!'

**Step 1** Open the cereal box out and turn over so you can draw on the non-printed side. Then draw the largest hand you can on half the paper. If you like you can draw on a piece of paper first, then cut this hand out and use as a template.

**Step 2** Do the same on the other side. For ease, you can use the first one as a template to draw around. Then cut them out. Be careful with scissors and have a grown up to help! You will need to do this four times to make two hand gloves.

**Step 3** Put one cardboard hand onto another and then tape around the edges, except for the bottom area which is the wrist. This is where you will put your hand in.

**Step 4** Decorate them with whatever you like and can find in your home

**Step 5** Put on, dance, wave, clap and have fun at your mini parade at home!

Do tag us in your pictures or videos. We would love to see them! **#ChildrensParadeAtHome**
